Lecture Notes in Computer Science 7128, Springer 2012, ISBN 978-3-642-32204-4 dblp: International Workshop on Digital Watermarking 2011 In this work, we propose several new methods for detecting photographic composites using circles. In particular, we focus on three kinds of scenes: (1) two coplanar circles with the same radius; (2) a single circle with its discriminable center; (3) a single circle with geometric constraints for camera calibration. For two circles' situation, we first estimate the focal length based on the ... Photographic composite detection using circles | SpringerLink The digital signature has been an essential tool in E-society which is designed to prevent alteration of a signed digital document. However, applications like E-Government, E-Education and E-Health systems need appropriate alteration of some signed

documents in order to hide sensitive information other than protect the integrity of the document. Information Computing and Applications, International ... In: International workshop on digital watermarking. Springer, Cham, pp 163-176
