highly powerful range of small to medium size single stage vacuum pumps for use in diverse industries including oil, gas, general industrial, and chemical. Available in cast iron for less aggressive applications, and stainless steel for hostile applications and environments. Liquid Ring Vacuum Pumps | Reliable NASH Solutions A liquid-ring pump is a rotating positive-displacement pump. They are typically used as a vacuum pump, but can also be used as a gas compressor. The function of a liquid-ring pump is similar to a rotary vane pump, with the difference being that the vanes are an integral part of the rotor and churn a rotating ring of liquid to form the compression-chamber seal. They are an inherently low-
