Open the hinged cover (2) of the misalignment switch by loosening the two screws (5) (s. fig. 5-4). 5. Put the connection cable through the fitting nut (6) (s. fig. 5-4). 6. Connect the cable to the connector strips (7) according to the connection diagram (s. fig. 5-5). 7. Close the hinged cover (2) of the misalignment Conveyor Belt Misalignment Switch Type MRS 001 There are Possible 4 different mounting positions ( $4 \times 90^\circ$ ) of the actuation lever onto the switch shaft. The axis of the roller should

be in right angle to the plane of the belt. The shaft of the switch should be above the housing. Conveyor belt misalignment (off-track) switch LHR Exactly and reliably, position misalignment switches monitor for possible drift on belt conveying systems. As the conveyor belt drifts, the edge of the belt touches the roller lever on the misalignment switch. Depending on the deflection, a pre-warning is signaled or a shutdown is triggered. In this way you can prevent unnecessary costs due to the loss of material and detect uneven belt wear at an early stage. Position misalignment switches for conveyor belt systems ... Operating Instruction Belt misalignment switch ZB0090 7391007/02, 05/2015 . | ZB0090 BG ... Operating Instruction Belt

misalignment switch ZB0090 Belt misalignment switches are mounted on the top or bottom of the conveyor stringer with the actuating arm adjusted to the outside edge of belt. If the belt skews or runs-off contacting actuating arm, displacing it from the arm's normal vertical position, one or more of the microswitches are contacted. Safety Cable Pull Switch Belt Misalignment Switch - Ramsey Switches the Touchswitches are correctly mounted in order to detect a belt misalignment condition and or a pulley misalignment condition, whichever it may be. Typical Touchswitch™ mounting positions are illustrated on pages 12-17. The Touchswitch™ hole should be cut into the housing with a 2-1/4"

diameter hole saw (Image A), OPERATION

### MANUAL Misalignment Switches

Conveyors may run out of line, causing major damage. For this reason, misalignment switches are provided to register belt

misalignment and to switch off the belt if necessary. Kiepe

Misalignment Switches are enabled by approaching and swinging out of the roller lever when a switching angle is reached. Misalignment
