Molecular Insights Into
Development In The second section
deals with molecular aspects of
development of specific organs and
structures such as, bone, face,
brain, heart, liver, pancreas, kidney.
The last section deals with specific
malformations and tumors that
provide insight into regulation of
growth. Environmental factors that
impact growth and development
are also covered. Molecular Insights

Heritable diseases of the skeleton. Part I: Molecular ... We will summarise recent molecular insights into development of the skull and face, then discuss the latest discoveries in the genetic basis of human craniofacial malformations including craniosynostosis, facial exostoses and cleft lip and/or palate. Newly identified disease genes underlying these pathologies are listed in Table 1.
