Normal Histology Histology is the study of the microanatomy of cells, tissues, and organs as seen through a microscope. It examines the correlation between structure and function. Histology Guide teaches the visual art of recognizing the structure of cells and tissues and understanding how this is determined by their function. Rather than reproducing the information found in a histology textbook, a user is shown how to apply this knowledge to interpret cells and tissues as viewed through a

microscope. Histology Guide Normal endocervical epithelium consists of columnar cells with round, basally oriented nuclei and pink apical cytoplasm. Ciliated cells can be found.
