Köppen climate classification is one of the most widely used climate classification systems. It defines a tropical climate as a region where the mean temperature of the coldest month is greater than or equal to 18 °C (64.4 °F) and classifies them as an A-group (tropical climate group). A-group regions are usually found below 25 latitude in both the southern ... Tropical climate - Wikipedia • Tropical

temperature remains relatively constant throughout the year and seasonal variations are dominated by precipitation. • Tropical Climates are those climates where heat is dominant problem where the greater part of year buildings serve to keep cool for occupants room rather than warm. TROPICAL CLIMATE 5. Tropical Climate - SlideShare Location of Case Studies . Detailed information of over 40 case studies are presented here. This includes a description of the project, building details, project team, climate analysis, design approach, energy systems and building material used, any special features as well as lessons learned. Tropical Buildings Most contemporary tropical housing adapts designs used in other climate zones,

resulting in the need to use mechanical space conditioning to provide basic comfort, thus isolating occupants from their surroundings. In contrast, the indigenous tropical house provides a close fit with climate, culture, and ecologically sound building practices. Tropical Case Study House -

PROTOTROPIC Temperatures in tropical wet-dry climate regions are high throughout the year but show a greater range than wet equatorial (Af) and Am climates (19–20 °C [66–68 °F] in winter and 24–27 °C [75–81 °F] in summer). In addition, annual rainfall totals are less than in the Af and Am climate types (50–175 cm [20–69 inches]), and most precipitation occurs as a result of convectional ... Tropical wet-dry climate |
