theories, and the ultimate purpose of science. Philosophy of science - Wikipedia Philosophers of science (it is argued) do not deal with the practical engagement with the world that is the central part of scientific activity, and their view of the nature and function of scientific theory is fanciful and biased (“theory” is seen as prior to, and more historically significant than “practice”). Philosophy of Science (Chapter 11) - The Cambridge History ... The philosophy of science is concerned with all the assumptions, foundations, methods, implications of science, and with the use and merit of science. This discipline sometimes overlaps metaphysics, ontology and epistemology, viz., when it explores whether scientific results comprise
